# Thin Client Atrust t66DL

Atrust t66DL is a Linux-based thin client device especially designed for a client/server computing environment. Developed by Atrust, the ACS (Atrust Client Setup) software is also built in to help effective management of t66DL. With the support of Citrix<sup>®</sup> ICA/HDX<sup>™</sup>, Microsoft<sup>®</sup> RDP<sup>™</sup> with RemoteFX<sup>™</sup> and VMware<sup>®</sup> Horizon View<sup>™</sup>, t66DL can be used to create virtual and session-based desktop experiences from many remote desktop capable operating systems. t66DL offers a rich computing experience where applications look, feel, and behave as local devices, including high-definition multimedia content.

### **Atrust t66DL Features**

#### Low total cost of ownership

Additional computing access is as simple as adding more I/O devices. The total cost of ownership is then drastically reduced.

#### Slim and quiet design

The slim design allows it to be mounted to the back of a monitor with a VESA mount. Together with its fanless design, t66DL helps create a simple and noiseless workplace environment.

#### Simple click and play

t66DL connects to the host server with a Remote Desktop connection. Just click the shortcut for a Remote Desktop session, you can immediately start a session and enjoy the computing resources.

#### Rich remote user experience

With Citrix® ICA/HDX $^{\text{TM}}$ , Microsoft® RDP $^{\text{TM}}$  with RemoteFX $^{\text{TM}}$  and VMware® Horizon View $^{\text{TM}}$ , t66DL can provide a rich, efficient, and "local" computing experience for remote users.

#### ▼ Easy management and maintenance

Since all computing tasks are mainly performed on a server, all hardware and software issues are significantly reduced on the client side. All user management, software installations, system management, and upgrades are done on a single server.
