## Thin Client Atrust t76L

Atrust t76L is a Linux-based thin client device especially designed for a client/server computing environment. Developed by Atrust, the ACS (Atrust Client Setup) software is also built in to help effective management of t76L. With the support of Citrix® ICA/HDX™, Microsoft® RDP™ with RemoteFX™ and VMware® Horizon View™, t76L can be used to create virtual and session-based desktop experiences from many remote desktop capable operating systems. t76L offers a rich computing experience where applications look, feel, and behave as local devices, including high-definition multimedia content.

- 1 Power LED**  
Indicates the status of power.
- 2 Power Button**  
Press to turn on/off the client.
- 3 Microphone Port**  
Connects to a microphone.

Connects to a monitor.
- 12 Kensington Lock Slot**  
Attach the t76L to a permanent object with the Kensington slot and a security cable.

## Atrust t76L Features

### Low total cost of ownership

Additional computing access is as simple as adding more I/O devices. The total cost of ownership is then drastically reduced.

### Slim and quiet design

The slim design allows it to be mounted to the back of a monitor with a VESA mount. Together with its fanless design, t76L helps create a simple and noiseless workplace environment.

### Simple click and play

t76L connects to the host server with a Remote Desktop connection. Just click the shortcut for a Remote Desktop session, you can immediately start a session and enjoy the computing resources.

### Rich remote user experience

With Citrix® ICA/HDX™, Microsoft® RDP™ with RemoteFX™ and VMware® Horizon View™, t76L can provide a rich, efficient, and “local” computing experience for remote users.

### Easy management and maintenance

Since all computing tasks are mainly performed on a server, all hardware and software issues are significantly reduced on the client side. All user management, software installations, system management, and upgrades are done on a single server.
